## SHAWS FIRECLAY SINKS

The genius of founder Arthur Shaw was to identify the waste material extracted from the colliery at Darwen, as fireclay. In 1897 he established Shaws of Darwen to make use of it. Today, at the same factory in Northern England, Shaws' own Heavy Duty Fireclay is fired hotter and longer to produce kitchen and bathroom sinks with an incredibly durable finish.

## PERRIN & ROWE BRASSWARE AND SANITARYWARE

At Perrin & Rowe's English foundry, molten brass is poured by hand at 1,000°C into intricate moulds. The finest grade brass is used to ensure a perfect cast. Each piece is precision machined before being polished by hand. This fusion of cutting-edge technology and traditional craftsmanship is the source of Perrin & Rowe's unrivalled reputation for quality.

## VICTORIA + ALBERT BATHS AND BASINS

To make beautiful baths and basins of the highest quality, Victoria + Albert developed their own unique material. Made from natural Volcanic Limestone™, QUARRYCAST™ is light, warm to the touch and incredibly strong. This gives Victoria + Albert's designers the freedom to create award-winning designs that can last a lifetime.
